Powered Endoscopic Linear
Cutter Stapler

Used for Tissue transection, resection and anastomosis in thoracic surgery, abdominal surgery, pediatric surgery and gynecologic endoscopy surgery.

Used for Tissue transection, resection and anastomosis in thoracic surgery, abdominal surgery, pediatric surgery and gynecologic endoscopy surgery.

Integrated machining Jaw
Achieve a thinner and flatter clamping
performance on target tissue

Battery motivated
Much Faster and More Stable

45° Articulation angle
Guarantee easier operation on different angles

Manual blade retrieval switch
Provide back up for emergency
